🐙 DigitalPotential
in Carlos Manriquez

Portfolio: carlosmanriquez.dev

Frontend | Client Side

- ✅ **Build and Deploy React applications**
- ✅ **API Integration**
- ✅ **Extensive Javascript knowledge**
- ✅ **Various CSS Frameworks**

Backend | Server Side

- ✅ **Set up and manage Servers in NodeJS**
- ✅ **Connecting to Databases and NoSQL**
- ✅ **Query data with various tools and languages**
- ✅ **Working with API Authorization**

Development Tools

- ✅ **Version Control with Git**
- ✅ **Deployment tools (e.g. Vercel)**
- ✅ **Package managers (e.g. NPM)**
- ✅ **Experience in working with teams**

Project: Spotify Clone

TypeScript, MUI, React, Spotify API, Basic Auth, CSS, Git
I developed a Spotify clone utilizing the Spotify API. This application allows users to log in to their actual Spotify accounts, access their personal playlists, and play, pause, and skip songs within their playlists.

Genius AI is an AI web app that utilizes APIs from Open AI and Replicate AI.
Users can opt for Code, Conversation, Image, Video, or Music to generate
content. A PRO version is available for subscription through Stripe.

(Yes, I built this software).

Experiences & About me

Experiences

Full-stack developer Consultant @ Brandroid.ai, Dec 2023 - Ongoing
In my role with Brandroid, I leverage my expertise in the MERN stack to lead development efforts, focusing on enhancing app functionality and integration with external services like Shopify, Facebook Adyen. My responsibilities include refining AI-driven content generation using OpenAI, troubleshooting integration challenges, and steering strategic app improvements. I actively negotiate platform permissions, ensure policy compliance, and engage with stakeholders to align on strategic decisions. My commitment is to enhance the user experience and expand app capabilities through innovative solutions and strategic partnerships.

Founder / Full-stack developer @ Pingloo.com, Aug 2023 - Ongoing
In my role at Pingloo, I've been central in shaping our tech stack, developing both our Next.js web and React Native mobile apps. My focus was on selecting innovative tools aligned with our vision, collaborating with a developer from Techover, and working closely with experienced project managers and startup founders. We adopted an agile approach, concentrating on building a stable and scalable architecture to ensure the app is responsive and adaptable for future user

Teacher / Full-stack developer @ Nackademin, Sep 2023 - Oct 2023
During September and October, over six weeks, I taught TypeScript for two days weekly, emphasizing full-stack development with TypeScript. Students engaged with tools like Next.js, Prisma, Zustand, Axios, and Zod within an Agile Scrum framework to create scalable, type-safe applications.

Techover Academy, Jan 2023 - Apr 2023
Professionally trained by industry consultants to become a React developer.

Digital Potential International, Feb 2020 - Jun 2023
As a Co-Founder, Frontend Developer, and Digital Marketer at Digital Potential International since February 2020, I have been actively involved in spearheading various technical and marketing initiatives. As a frontend developer, I have successfully built and maintained visually appealing and user-friendly websites using cutting-edge technologies. In addition, my digital marketing expertise has allowed me to craft effective strategies to drive online visibility, user engagement, and conversions. Being self-employed in this role has nurtured my entrepreneurial spirit and enhanced my problem-solving abilities. With over three years of experience in this multifaceted role, I have developed a diverse skill set that enables me to deliver comprehensive solutions and contribute to the success of the projects I undertake.

Flux Academy, Jan 2020 - Jan 2021
During my time at Flux Academy from January 2020 to January 2021, I received comprehensive training in various aspects of web development. This included mastering the art of web design using tools like Webflow and acquiring expertise in front-end development. Throughout the program, I cultivated strong problem-solving skills and a keen eye for detail, enabling me to create visually appealing and user-friendly websites. With a solid foundation in web development, I am equipped to contribute effectively to projects and deliver outstanding results in this dynamic field.

About me

My ambition to become a full-stack developer is fueled by my passion for technology, continuous learning, and personal growth. I thrive on the challenge of creating solutions that not only function effectively but also provide an exceptional user experience. As a developer, I possess several valuable traits that enhance my work. Firstly, my strong problem-solving skills enable me to analyze complex issues and devise efficient solutions. Additionally, my attention to detail ensures the delivery of high-quality code and seamless functionality. I have extensive experience in web development, utilizing various technologies and platforms such as React, Webflow, WordPress, Shopify, and Wix.

Witnessing my ideas come to life and creating products that make a difference for end-users is immensely gratifying. For me, being a developer is more than just a job—it is an ongoing journey of growth and challenge. I am currently seeking a position as a full-stack developer, where I can contribute my technical expertise and creative mindset to drive innovative solutions.
